

ComboXCAT

Modular Rack-Mount KVM Console/Switch

- Multi-platform USB and PS/2 support
- High-density – Up to 32-ports in 1U rack-space
- Choice of Cat5-based integrated KVM switches or "traditional" KVM-cable-based KVM switches
- Modular design – connect any of five (5) models KVM switches to the back of ComboXCAT KVM Drawer
- Optional Remote Desktop enables control from an extended console over CAT-5 up to 1000 feet away
- Modular design allows KVM switch to keep servers alive while servicing the KVM Drawer
- High-brightness and high contrast-ratio 17" or 19" active TFT LCD flat panel folding display

ComboXCAT is a KVM Drawer with a modular KVM switch mounted to its back, allowing it to control and access multiple servers – **any mix of USB and PS/2 servers** – at the rack, using only 1U of EIA rack space (1.75" high).

Whether your installation can handle coax cables or whether it requires a clutter-free high-density Cat5-based system – ComboXCAT offers the best of both worlds.

ComboCAT KVM switches utilize RJ45 jacks to connect CAT 5e/6 cables (not included) to CCP "Dongles" on the server end. This setup is most flexible since the universal CCPs can connect to both USB and PS/2 servers.

ComboX KVM switches utilize a single HD-15 connector that supports a ComboX KVM cable – either USB or PS/2 – at either 6- 10- or 15-foot length.

Models	Computer Interface	Ports	Special Features
ComboCAT	• CAT-5e/6	<ul style="list-style-type: none"> • 8 • 16 • 32 	<ul style="list-style-type: none"> • CCP "Dongles" Support 130ft Distance • Universal (USB-PS/2) CCP Available • PS/2 CCP Available • Remote Desktop (1000ft) over CAT-5
ComboX	• KVM Cable	<ul style="list-style-type: none"> • 8 • 16 	<ul style="list-style-type: none"> • 2-in-One USB Cables Optional • 3-in-One PS/2 Cables Optional • Remote Desktop (1000ft) over CAT-5
